**Clematis:** These vines make a wonderful flowering vine. They have large purple, white, red, pink, or multiple colored flowers. We have heard many people say that they have had trouble getting clematis to grow. They require well-drained deep soil with an adequate mixture of approximately 10% peat moss mixed in with the existing garden soil 18" deep before planting. The clematis requires at least ½ day or more of good full sun; however, the roots need to be kept cool. (Plant behind bushes or provide shade over the roots.) Buy only well established clematis plants that have been grown in the pot for at least one year for best results. Most varieties can be pruned in the early spring if necessary, or after flowering. Remove the dead wood.

\*Asao-huge rosy-pink flowers with white tones in spring, 6-10'
